

Paul Spice Project Design Sheet

*This design sheet will be kept up to date as the project continues

5/23/2022

Design Scope: May 25th 2022 - June 12th 2022 (18 Days)

For this project we will be building a responsive interior design website focusing on mobile first. The design will include:

- A sliding effect with a smooth transition on the landing page
- A color scheme with three (3) colors: Tan (#CCB28E), Black (#201E1F) and White (#FFFDF7)
- To add a splash of color, we will be using the clients' photos
- When a user clicks on a room section to browse, they will be redirected to a different page

We also need to work on branding for the client. Branding for Mr. Spice will include:

- A color palette
- Logo design
- Typography

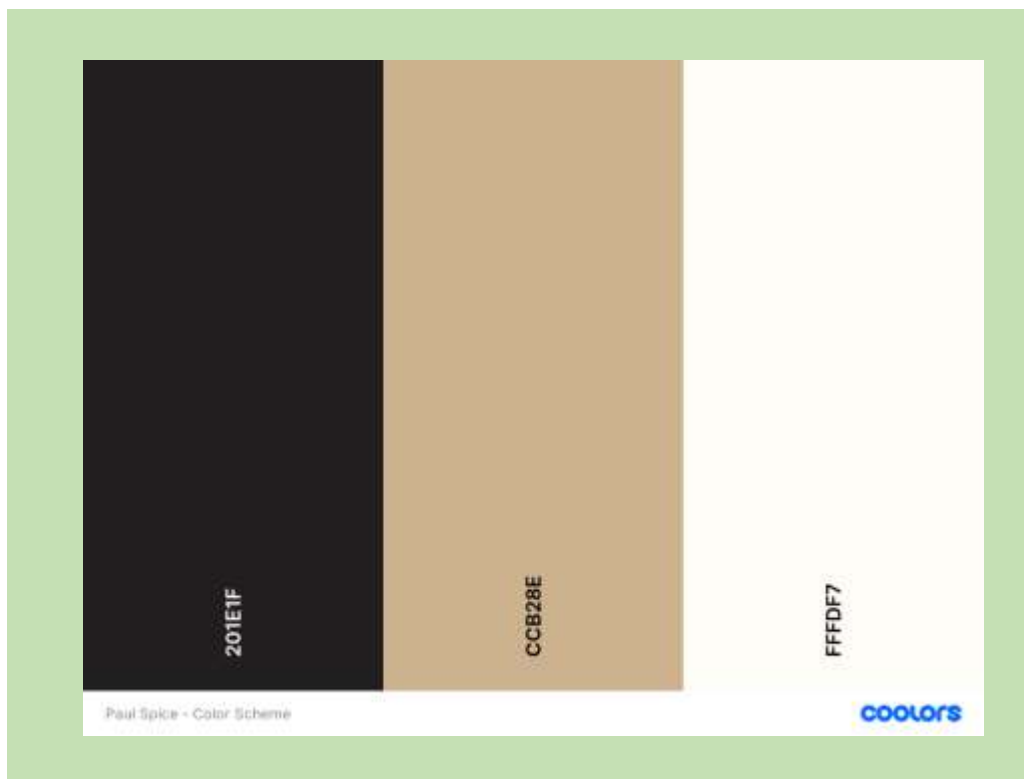

Color palette and design inspiration
